DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Mr. Victor Segura during a telephone interview on 4/28/06.

The application has been amended as follows:

Amend claim 13 as followed:

-- A method for calculating the relative volumetric flow-rates of at least one of the phases of a multiphase effluent flowing in a well, said method comprising a first step of acquiring local volumetric fractions and/or velocities of said phases across a section of the well at a certain depth, and wherein the method further comprises:

- correcting said local volumetric fraction and/or velocity measurements in order to make them consistent with each other and/or with the effluent flow conditions;
- selecting a suitable flow model mathematically representing the effluent flow, the flow model being a combination of a predetermined hold-up profile and a velocity that corresponds to a known flow pattern;
- interpolating said local volumetric fractions measurements and/or said local velocity measurements by the selected flow model in order to obtain a volumetric fraction profile and/or a velocity profile for at least one phase of the effluent across said section of the well at said depth;
- calculating the relative volumetric flow rates of said at least one phase by integration of said volumetric fraction and/or velocity profiles over said section of the well at said depth. –
- using said relative volumetric flow rates in operations related to a well in production.

Allowable Subject Matter

Claims 13-24 are allowed.

The reasons for the indication of allowable subject matter has been stated in Applicant's Reply dated 4/13/06.
